Others<sup>20</sup>  
Drugo

EFB

**Remarks:**

1. Telephone and fax contact details of the competent authority, including the country code. E-mail to be provided if available.
2. Insertion of associated air operator certificate (AOC) number.
3. Insertion of the operator's registered name and the operator's trading name, if different. Insert "DbA" before the trading name (for "Doing business as").
4. Issue date of the operations specifications (dd-mm-yyyy) and signature of the competent authority representative.
5. Insertion of ICAO designation of the aircraft make, model and series, or master series, if a series has been designated (e.g. Boeing-737-3K2 or Boeing-777-232).
6. Either the registration marks are listed in the operations specifications or in the operations manual. In the latter case the related operations specifications must make a reference to the related page in the operation manual. In case not all specific approvals apply to the aircraft model, the registration marks of the aircraft could be entered in the remark column to the related specific approval.
7. Listing of geographical area(s) of authorised operation (by geographical coordinates or specific routes, flight information region or national or regional boundaries).
8. Listing of applicable special limitations (e.g. VFR only, Day only, etc.).
9. List in this column the most permissive criteria for each approval or the approval type (with appropriate criteria).
10. Insertion of applicable precision approach category: LTS CAT I, CAT II, OTS CAT II, CAT IIIA, CAT IIIB or CAT IIIC. Insertion of minimum runway visual range (RVR) in meters and decision height (DH) in feet. One line is used per listed approach category.
11. Insertion of approved minimum take-off RVR in meters. One line per approval may be used if different approvals are granted.
12. Not Applicable (N/A) box may be checked only if the aircraft maximum ceiling is below FL290.
13. Extended range operations (ETOPS) currently applies only to two-engined aircraft. Therefore the Not Applicable (N/A) box may be checked if the aircraft model has more or less than two engines.
14. The threshold distance may also be listed (in NM), as well as the engine type.
15. Performance-based navigation (PBN): one line is used for each PBN approval (e.g. area navigation (RNAV) 10, RNAV 1, required navigation performance (RNP) 4,...), with appropriate limitations or conditions listed in the "Specifications" and/or "Remarks" columns.
16. Limitations, conditions and regulatory basis for operational approval associated with the PBN approval (e.g. global navigation satellite system (GNSS), distance measuring equipment/DME/inertial reference unit (DME/DME/IRU), ...).
17. Approval to conduct the training course and examination to be completed by applicants for a cabin crew attestation as specified in Annex V (Part-CC) to Commission Regulation (EU) No 1178/2011.
18. Approval to issue cabin crew attestations as specified in Annex V (Part-CC) to Commission Regulation (EU) No 1178/2011.
19. The name of the person/organisation responsible for ensuring that the continuing airworthiness of the aircraft is maintained and a reference to the regulation that requires the work, i.e. Annex I (Part-M), Subpart G to Commission Regulation (EU) 1321/2014.
20. Other approvals or data can be entered here, using one line (or one multi-line block) per authorisation (e.g. short landing operations, steep approach operations, helicopter operations to/from a public interest site, helicopter operations over a hostile environment located outside a congested area, helicopter operations without a safe forced landing capability, operations with increased bank angles, maximum distance from an adequate aerodrome for two-engined aeroplanes without an ETOPS approval, aircraft used for noncommercial operations).
